应用范围 Application

Material:ABS, UV resistance

Length:550mm/680mm

Color:White/Black

50% weight reduction

Solar panel corner brackets can be used with any size aluminum framed solar panel to provide a secure attachment for vehicles, caravans, boats, outdoor buildings, etc.

The solar corner brackets will support the solar panel at the optimal height above the surface to allow aeration from below, ensuring that the solar panel operates as efficiently as possible.

Brackets can be securely attached to the surface eliminating the need to drill holes. The brackets also function as a wind deflector and maintain the correct air gap between the solar panel and the roof top /cover.
